

Our Statement actions for Eco-friendliest and helping UK businesses

Imrali inventions Ltd is committed to help reduce global pollution as well as supporting the local business and communities in the UK.

- We do our best to support and purchase from UK based businesses wherever possible.
- When we need to buy/import our components or parts internationally we may purchase directly from the manufacturer in order to reduce unnecessary transportations across multiple channels or sellers.
- We are specialized in inventing and making eco-friendly devices.
- We only use high quality parts and primarily choose the ones that are non-toxic or has minimum or no long-term harming effect to the environment.
- All our products are fully ROSH compliant.
- We recycle all of our recyclable waste through local council and minimise the use of nonrecyclable items
- We donate our no longer needed equipment's to local community. Eg, computers, 3D printers, etc are gifted to our local community for kids to learn and catch up with technology.
- We use recyclable packaging with no plastics as well as re-use the suitable packaging materials received through our business activity
